

Fusion FlashDNC™

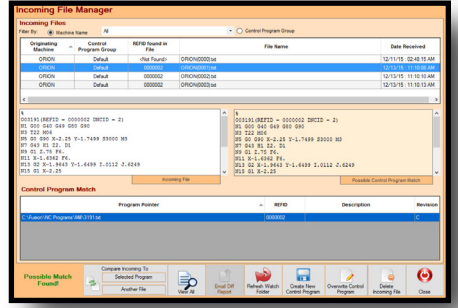

The power of DNC.
The convenience of a Memory Card or USB.

Plug the Flash Media into any PC running Fusion Client Software

FlashDNC™ allows you to select and move NC Programs on the flash media to Fusion's Incoming File Manager.

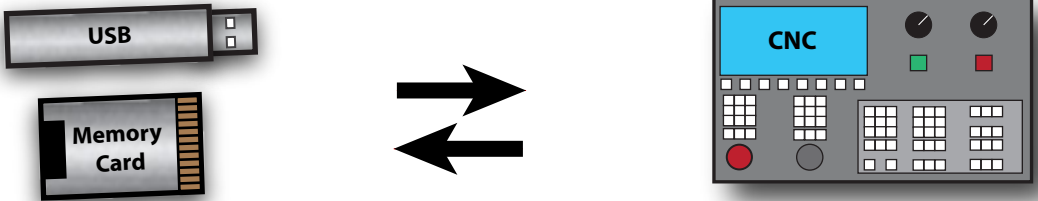

Select the file(s) you want to send to the CNC using Fusion's NC Program Navigator

FlashDNC™ automatically moves the selected file(s) to the flash media.

Plug the Flash Media into your CNC to move files to and from your Control

No expensive RS232 cables, Ethernet to Serial Adapters, Wireless Hardware or costly installation!

Fusion FlashDNC™ gives you the following functionality and more. See additional Fusion literature for details:

- NC Program Database with Revision Field and Historical Notes
- Record locking for Revision Control
- Program Grouping by Machine
- Incoming File Manager with Automated File Matching and Quick Compare Launch
- DNC Activity Audit Trails and Reports

Implement selectively: Use FlashDNC™ on your media-capable CNCs.
Use serial, Ethernet or wireless on your other CNCs.

FlashDNC™ uses patent pending technology from Nexas America LLC.
